

FE-SERIES FE4000

TIP EXTRACTION

FE4000 is a spot suction unit with high separation degree of both particles and gases in different processes. It is a high vacuum system, driven by an electrical motor. The unit has inlets for two soldering irons.

The FE4000 has a low sound level and is very easy to maintain. It does not require much space on the workbench. Suitable applications are soldering and gluing.

TECHNICAL DATA

Max connected soldering irons	2 pcs	Suction capacity, 2 irons	30 L/min
Height	290 mm	Power consumption	70 W
Diameter	140 mm	Mains voltage	230 V, 50/60 Hz
Weight	4,9 kg	Sound level at 1 meter	40 dB(A)
Max vacuum	3 000 Pa	Micro filter, separation degree	99,99 %

Filter Systems

Filtronic AB is striving to create a better workbench environment by developing and producing particle and gas filter systems of very high quality. The filter systems have a long filter lifetime and low energy costs, are easy to install, have a low noise level and a guaranteed function of both gases and particles.
