

High Temperature Polyimide Labels

Polyimide can be used for high temperature and solvent resistant PCB applications. Products are available to withstand the SMT and wave solder process and both offer excellent high density bar code readability.

Applications include: - *Component identification*
PCB identification (For both SMT & Wave process's)
Pb-Free PCB marking (Green Polyimide)

White Polyimide 714 is a 1 Mil (25µm) coated White Polyimide film with a permanent acrylic adhesive. Total thickness is 0.069mm and it has a service temperature of -46°C to +300°C. For best results use our RHT40 ribbon which is available to suit all printers.

Recommended for SMT & Bottom side (direct wave contact) wave solder applications.

Green Polyimide 748 is a 1 Mil (25µm) coated Light Green Polyimide film with a permanent acrylic adhesive. Total thickness is 0.069mm and it has a service temperature of -46°C to +300°C. For best results use our RHT40 ribbon which is available to suit all printers.

Recommended for identification of lead-free manufactured PCB's - for SMT & Bottom side (direct wave contact) wave solder applications.
